Exercices

Reconnaitre des représentations de fractions

Petit conseil :

Avant de commencer les exercices, réfléchis bien à ce que représente chaque nombre dans une fraction.

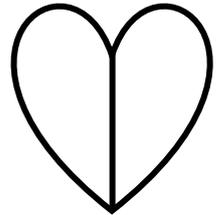

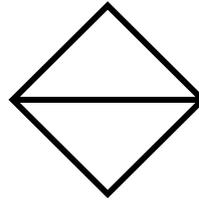

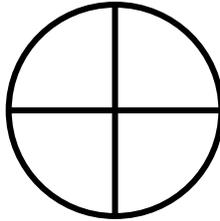

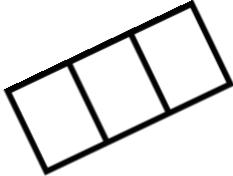

1 - Colorie avec la bonne couleur.

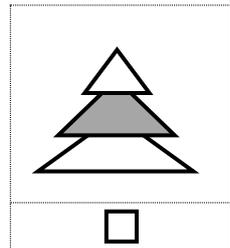

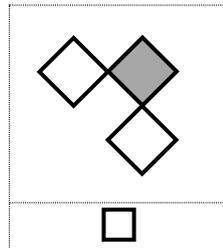

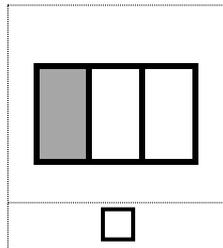

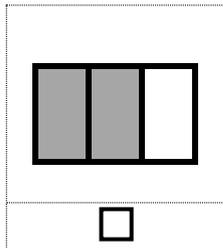

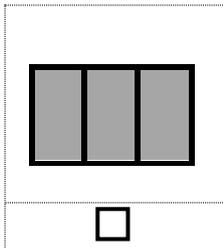

En **vert**, les figures coupées en demis.

En **bleu**, les figures coupées en tiers.

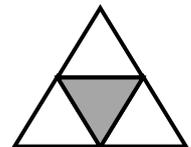

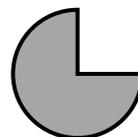

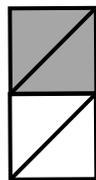

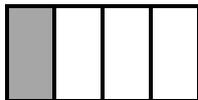

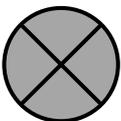

En **orange**, les figures coupées en quarts.

2 - Coche les figures dont la partie grise représente $\frac{1}{3}$ de l'unité.

3 - Entoure les surfaces dont la partie grise représente $\frac{1}{4}$ de l'unité.

Autoévaluation

Ces exercices étaient selon moi :
